THE BOTTOMLINE OF VACCINATION

AUGUST – OCTOBER 2026

India runs the

largest vaccination cohort in

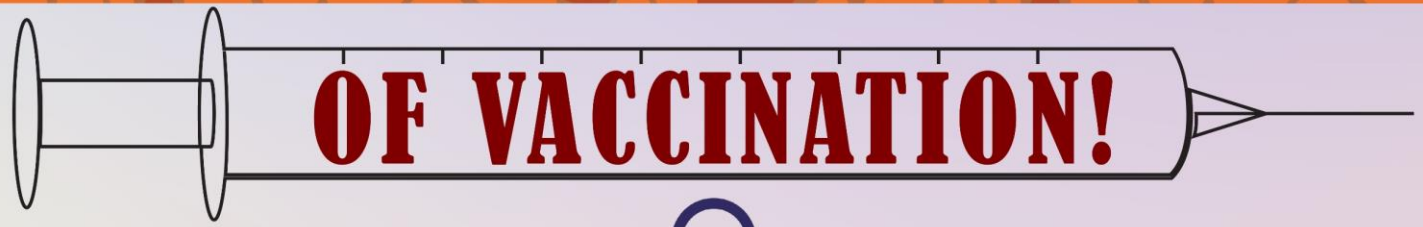

the world, **2.5 crore children**

and **2.9 crore pregnant women**

by organising over **1.3 crore** sessions per year,

across the length and breadth of the country.

A robust political will,

a strong supply chain management,

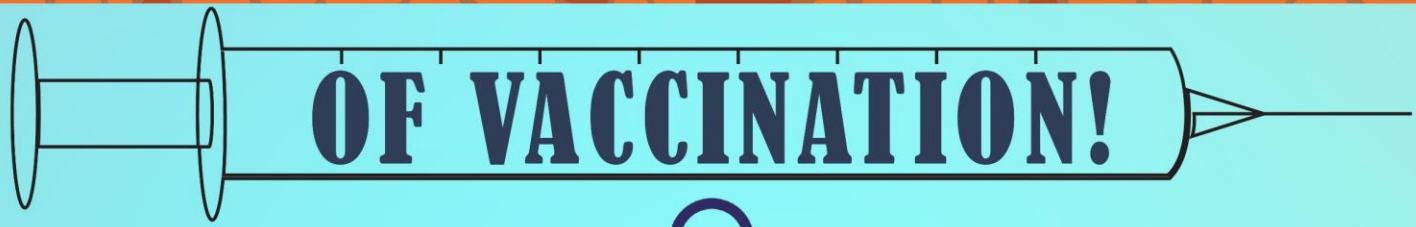

rigorous pharmacovigilance supported by

thousands of frontline workers are

at the core of the stupendous success of

immunization in India.

India's **Mission Indradhanush,**
a strategy of vaccination in a campaign mode,
aiming largely at **Zero Dose** and **left out**
children is recognised globally as a
benchmark in reducing morbidity and
mortality among children from VPD's.

India was declared

Polio Free in 2014.

As polio still persists in some neighbouring countries, remember to provide **polio drops** to your child when announced.
